DETAILED ACTION

Receipt is acknowledged of Applicant's Amendment filed on 03/27/2006. Claims 1, 11, 14 and 15 have been amended and new claims 16 has been added. Claims 1-16 are pending in the instant application.

Claim Rejections - 35 USC § 103

Claims 1-16 rejected under 35 U.S.C. 103(a) as being unpatentable over TAKETOSHI (JP2001-278810) are maintain as of record in the previous office action filed on 09/26/05.

Response to Arguments

Applicant's arguments filed 03/27/2006 have been fully considered but they are not persuasive.

Applicant argues that TAKETOSHI composition is bonded by dipolar bond (see pg. 9 of Argument) and not ionic bond such as Applicant's composition. The Examiner finds this argument unpersuasive, because TAKETOSHI disclosed drugs with carboxyl groups, hydroxyl groups, amino groups or amide groups are suitable for drug intramolecular [bonding]. Applicant's bonding of the itraconazole drug is by an amine group (see SPEC. pg. 9, line 10-20), which is the same as an amino group. Thus, TAKETOSHI composition bonding must be the same as Applicant.

Applicant alleges that TAKETOSHI displaced hydrogen ions with Na⁺, which are necessary for ionic bonds; therefore, there is no ionic bonding in TAKETOSHI's

Art Unit: 1618

composition. The Examiner finds this argument unpersuasive, because (hydrogen ion) H^+ is also a cationic ion; furthermore, Applicant's own method places cationic ions, such as Na^+ or Ca^{2+} , between the layers (see SPEC pg. 6, line 21). TAKETOSHI disclosed other cationic ions such as Ca^{2+} , K^+ , Mg^{2+} , etc. Additionally, it would have been obvious to the person of ordinary skill to interchangeably replace a cationic ion with another cationic ion, such as H^+ .

Note, Applicant's method of making the composition is the same as TAKETOSHI. Thus, TAKETOSHI composition must be a stable amorphous structure.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
